News: [□ Taorad LMP-1 Polarization Microscope Provides Insights — Even into the Brain's Tiniest Fibre Tracts \(customer's press-release\).](#)

Taorad develops novel methods and instruments for the structural and biophysical characterization of biomolecules, spanning length scales from atomic up to macroscopic resolution.

Taorad is a spin-off of the RWTH-Aachen University, Germany.

All technologies are developed in cooperation with strong partners from companies and research institutions like the Fraunhofer Society, the largest research organization for applied research in Europe.
